Functions

- Management of the vehicle master data, fuel and service data
- Costs management
- Toll costs that are settled via a service card provider
- Maintenance instructions
- Management of insurance and leasing data
- Accident and damage analyses
- Standardized or individual reports

Costs structure

Performance

Only who knows the costs is able to reduce the costs!

The FIMS Costmanager shows by means of many different reports how the individual costs are dispersed in the fleet. In this way it offers an economically efficient solution for the costs control of the entire fleet.

Benefits

- Surveillance of the profitability of the vehicle fleet (fleet controlling)
- Administration management for the capture and management of master data
- Fuel management for the capture and evaluation of the vehicle and usage specific fuel consumption
- Evaluation management for the identification of the savings and optimization potential in a fleet
